<b>Headline</b>	<b>Takaful Malaysia Posts Record-breaking Revenue in FY22</b>		

Takaful Malaysia Keluarga Bhd's operating revenue increase was mainly attributable to higher sales from the family takaful and general takaful businesses.

The general takaful arm of Takaful Malaysia generated gross earned contributions of RM282.9mil for the quarter under review – an increase of 15% compared to RM245.1mil in the corresponding quarter of the previous year, mainly driven by the fire and motor class of business.

"Our established core businesses in the bancatakaful, treasury, employee benefits and general takaful business segments continue to set a solid foothold of our market presence to expand our market share and strengthen our leadership in the takaful industry," says Nor Azman.

"Given the increasing demand for takaful products and the vibrant market environment, we focus on penetrating the market further and capitalising on business opportunities.

"We will leverage our leading market position in credit-related and general takaful business segments, develop advisory family takaful business and focus on retail market expansion to provide Malaysians with greater access to comprehensive and affordable protection solutions, ranging from general to family takaful products.

"Our strategic direction is to diversify our business portfolio and ensure future sustainable business to complement our existing core businesses.
